👤 PROFILE

Detail-oriented and passionate Software Engineer with a BSc in Software Engineering from Bahir Dar University and hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in building responsive, user-friendly interfaces and scalable backend APIs. Previously worked as a Functional Consultant at CNET, contributing to system analysis and client support. Strong understanding of modern web technologies, RESTful APIs, and cloud-based tools. Eager to join a collaborative team where I can contribute to impactful projects and continue growing as a developer.

📁 PROFESSIONAL EXPERIENCE

Functional Consultant CNET Software Technologies, Ethiopia Jan 2025 – Jul 2025 Key Responsibilities:
Collaborated with clients to gather and analyze business requirements for software solutions. Participated in software configuration, functional testing, and user training sessions. Assisted in writing technical documentation and improving internal workflows. Worked alongside development teams to ensure successful implementation and support. Gained hands-on experience in software customization, system integration, and client communication.

🎓 EDUCATION

2018 – 2023

SoftWare Engineering

Bahir Dar

GPA: 3.51 | Exit Exam Score: 70%

Completed a well-rounded program focused on software development, networking, and system design. Gained strong skills in full-stack web development using technologies like React, Node.js, and MongoDB. Studied computer networks, operating systems, and database systems. Applied practical knowledge through hands-on projects, team collaboration, and real-world software solutions.

🧠 SKILLS

- 🔧 Technical Skills Web Development: React.js, Node.js, Express.js, MongoDB, JavaScript, HTML5, CSS3, Tailwind CSS, RESTful APIs
- Tools & Platforms: Git & GitHub, Postman, VS Code, Cloudinary, Multer, Chapa Payment Integration
- Database & Backend: MongoDB, Mongoose, Express Middleware, JWT Authentication
- Other Skills: Problem-solving, Team Collaboration, API Integration, E-commerce Functionality, Responsive Design, Functional Documentation, Client Support

LANGUAGES

Amharic

English

CERTIFICATES

- Computer Programing

INTERESTS

- Technology and Software Development
- Innovation and Creative Projects
- Reading About Emerging Tech Trends

PROJECTS

E-commerce Project

Built a full-stack e-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with a focus on responsive design and user experience. Implemented product listing, user authentication, shopping cart with size and color options, order management, and payment integration using Chapa. Utilized Cloudinary for image uploads and Multer for backend file handling. Applied RESTful API principles and context API in React for state management. Ensured smooth client-server communication, and developed features like order tracking and review submission to enhance customer interaction.

Doctor Appointment Booking System

Developed a responsive web application to streamline the booking of medical appointments. Built with React for the frontend and Node.js/Express for the backend, connected to a MongoDB database. Features include user registration and login, appointment scheduling with doctors based on available time slots, real-time appointment status updates, and notifications. Integrated calendar view and user-friendly forms to enhance the patient experience. Implemented secure authentication and role-based access for patients and doctors.
